DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 3/19/04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of any patent granted on application 09/926,297 or patent 6,507,006 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 13, 14, 15, 17 and 21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4, 7 and 8 of copending Application No. 10/746,081. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of 10/746,081 disclose all the features of instant claims 13-15, 17 and 21. The only difference in the claims of the application and the instant claims is the phrase "ceramic heater" in instant claim 13. This term does not structurally distinguish over the

Art Unit: 1772

term "ceramic substrate" in 10/746,081 and there are no patentably distinguishing features attributable to the term "heater". Therefore the instant claims are not patentably distinct from the claims of 10/746,081

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

4. Claims 16, 18, 19, 20 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
